

MODULE 1.3 JAVAFX PROGRAM

**ELVIA GISELLA ADAIR
STUDENT**

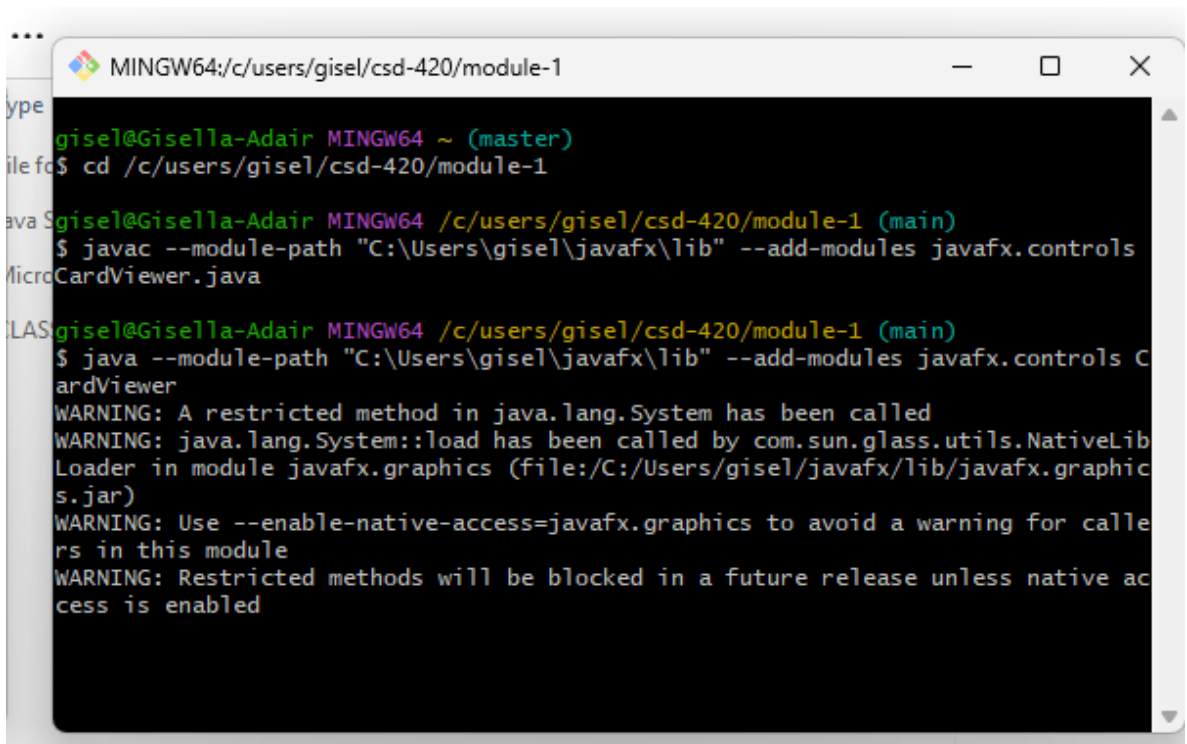

PROFESSOR LEWIS

MARCH 29TH 2026

MODULE 1.3 JAVAFX PROGRAM

Write a JavaFX program that displays four images randomly selected from a deck of 52 cards. The AssignmentCards.zip has card files titled 1.png, 2.png, 3.png, 4.png, ..., 52.png. For this application:

- Store the images in a “cards” subdirectory.
- Using these cards, randomly select four cards for display.
- Below the cards, there will be a refresh button that will then display four different cards.
- Use Lambda Expressions.
- You may use a different set of images that you either have or decide to make.
